### Requirements

#### Consoles

- A VGA, SVGA, SXGA, UXGA, or multisync monitor capable of the highest resolution that you will be using on any computer in the installation
- A USB keyboard
- A USB mouse

#### Computers

The following equipment must be installed on each computer that is to be connected to the system:

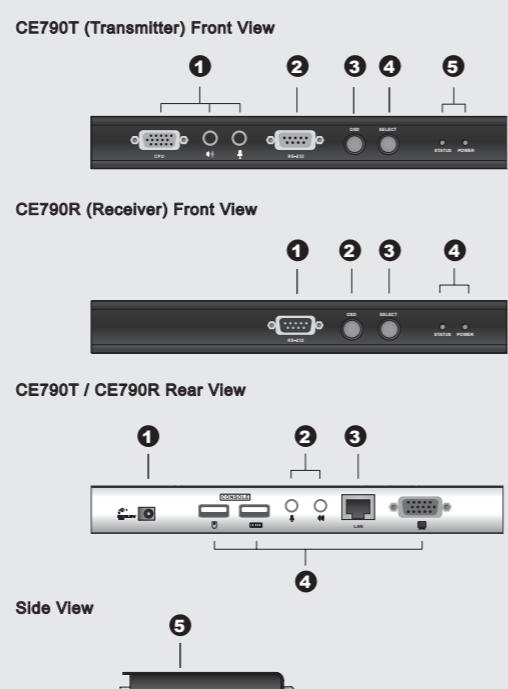

- A VGA, SVGA, SXGA, UXGA, or multisync card.
- USB host controller and Type A USB port.

#### Cables

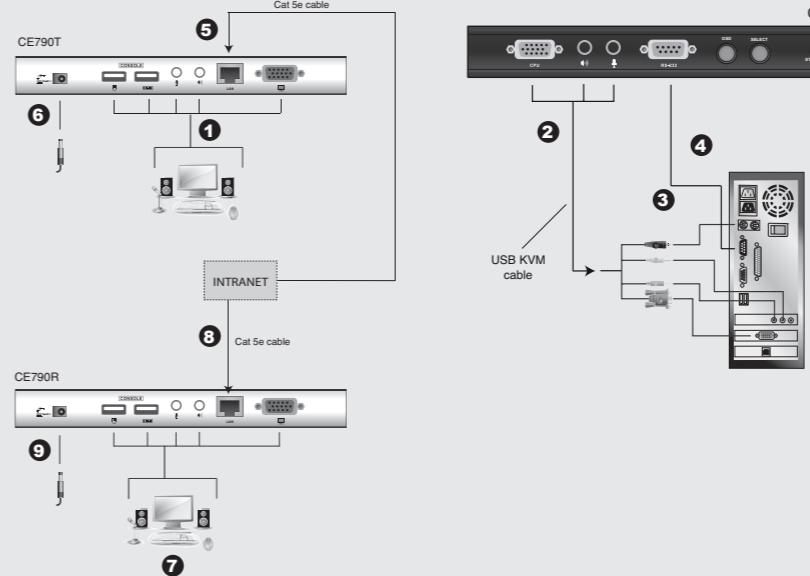

• For optimal signal integrity, and to simplify the layout, we strongly recommend that you use the high quality custom USB KVM Cable that is provided with this package.

#### Hardware Installation

##### Rack Mounting

For convenience and flexibility, the CE790T and CE790R can be mounted on system racks. To rack mount a unit do the following:

1. Using the screws provided in the Rack Mount Kit, screw the mounting bracket into the top or bottom of the unit.
2. Screw the bracket into any convenient location on the rack.

Note: These screws are not provided. We recommend that you use M5 x 12 Phillips Type I cross, recessed type screws.

#### Setting Up Point to Point / Network installation

Note: In a point-to-point configuration, no administrator setup of the units is necessary. In a networked installation, if there is only one system connected to the TCP/IP LAN, the CE790 will work with the preconfigured factory default network settings. If there are multiple units on the TCP/IP LAN, the units must be configured with unique IP addresses.

Make sure that all the equipment to be connected up is powered Off. Refer to the installation diagrams do the following:

1. At the transmitter site, plug the cables from the console devices (mouse, keyboard, monitor, microphone, speakers) into their ports on the Console section on the rear of the CE790T transmitter. Each port is marked with an appropriate icon to indicate itself.
2. Plug the appropriate connectors on the USB KVM cable supplied with this unit into their ports on the KVM section on the front of the CE790T transmitter.
3. Plug the connectors on the other end of the USB KVM cable into the appropriate ports on the computer. Each connector is marked with an appropriate icon to indicate which it is.
4. For control of serial devices, connect the RS-232 serial port on the transmitter to a serial port on the computer.
5. a. For a point-to-point configuration, connect one end of a Cat 5e cable to the CE790T's LAN port (located on the rear of the unit).
- b. For a networked configuration, use a Cat 5e to connect the CE790T's LAN port to the TCP/IP LAN.
6. Plug one of the power adapters (supplied with this package) into an AC source; plug the adapter's power cable into the CE790T's Power Jack.
7. Next, at the receiver site, plug the cables from the receiver console devices (mouse, keyboard, monitor, speakers, microphone), into their ports on the Console section of the CE790R.
8. a. For a point-to-point configuration, connect the other end of the Cat 5e cable to the CE790R's LAN port (located on the rear of the unit).

- b. For a networked configuration, use a Cat 5e to connect the CE790R's LAN port to the TCP/IP LAN.

9. Plug the second power adapter (supplied with this package) into an AC source; plug the adapter's power cable into the CE790R's Power Jack.

10. For a networked configuration only: Use the OSD to configure the network settings for the CE790 T and CE790R units. Repeat these steps for every CE790 system you wish to install on the TCP/IP LAN.

### Operation

#### Invoking the OSD

The On Screen Display (OSD) is a keyboard-driven menu-based method to handle control and configuration operations. Both the CE790T transmitter and the CE790R receiver units have OSDs. All procedures start from the OSD main screen. To invoke the OSD, either press the OSD pushbutton on the front of the unit, or tap the Scroll Lock key twice.

Note: You can change the OSD invocation hotkey to the left or right [Ctrl] keys.

The Ctrl keys must be both left, or both right.

Select the Destination(CE790T) or Source(CE790R) to connect.

### GUI (AP)

The CE790 can be operated remotely via a Graphical User Interface (GUI). Please visit the ATEN website ([www.aten.com](http://www.aten.com)) to download the CE790 AP.

8. a. En configuration point à point, branchez l'autre extrémité du câble de Catégorie 5e sur le port LAN du CE790T (situé à l'arrière de l'appareil).
- b. En configuration réseau, connectez le port LAN du CE790T au LAN TCP/IP à l'aide d'un câble de Catégorie 5e.

9. Branchez le deuxième adaptateur secteur fourni sur une prise de courant et sur la prise d'alimentation du récepteur CE790R.

10. En configuration réseau uniquement : Utilisez le menu OSD (affichage à l'écran) pour configurer les paramètres réseau des appareils CE790T et CE790R. Répétez chaque étape pour chaque système CE790 à installer sur le réseau local TCP/IP.

### Utilisation

#### Activation de l'affichage à l'écran (OSD)

L'affichage OSD propose un menu permettant de contrôler le système et les opérations de configuration à l'aide du clavier. Le transmetteur CE790T et le récepteur CE790R permettent tous deux un affichage à l'écran. Toutes les procédures s'effectuent à partir du menu principal de l'OSD. Pour invoquer l'OSD, appuyez sur le bouton OSD à l'avant de l'appareil ou appuyez deux fois sur la touche Arrêt défilt.

Remarque : Vous pouvez remplacer le raccourci d'invocation de l'OSD par les touches [Ctrl] de gauche ou de droite. Vous devez appuyer deux fois sur la touche Ctrl de gauche ou de droite après avoir attribué le raccourci d'invocation OSD à la touche Ctrl correspondante.

Sélectionnez la Destination (CE790T) ou la Source (CE790R) à se connecter.

### Interface graphique utilisateur (AP)

Le système CE790 peut être commandé à distance par le biais de l'interface graphique utilisateur. Veuillez visiter le site Internet d'ATEN ([www.aten.com](http://www.aten.com)) pour télécharger l'application destinée au système CE790.

### Voraussetzungen

#### Konsolen

- Un moniteur VGA, SVGA, SXGA-, UXGA- oder Multisync-Monitor, der in der Lage ist, die höchste Auflösung darzustellen, die Sie auf einem der zu installierenden Computer verwenden möchten.
- Ein USB-Tastatur.
- Eine USB-Maus.

#### Ordinateurs

Les composants suivants doivent être installés sur chaque ordinateur à connecter au système :

- Une carte VGA, SVGA, SXGA, UXGA ou Multisync.
- Un contrôleur d'hôte USB et un port USB de type A.

#### Câbles

• Pour assurer une réception optimale du signal et simplifier l'installation, il est recommandé d'utiliser le câble KVM USB spécifique de haute qualité fourni avec le système d'extension.

## CE790 Digital KVM Extender - Guida rapida

### Requisiti

#### Console

• un monitor VGA, SVGA SXGA, UXGA o Multisync, con la più alta risoluzione fra quelle utilizzate dal computer dell'installazione

• Una tastiera USB

• Un mouse USB

#### Computer

Su ogni computer da collegare al sistema deve essere installato il seguente equipaggiamento:

• una scheda VGA, SVGA, SXGA, UXGA o Multisync

• Host Controller USB e porta USB di tipo A

#### Cavi

• Al fine di migliorare l'integrità del segnale e di semplificare il layout, si consiglia di utilizzare il cavo personalizzato di alta qualità USB KVM incluso alla confezione.

### Hardware

#### CE790T (trasmettitore) - Lato anteriore

1. Sezione della porta KVM 4. Pulsante di selezione

2. Porta seriale RS-232 5. LED

3. Pulsante OSD

#### CE790T (ricevitore) - Lato anteriore

1. Porta seriale RS-232  
2. Pulsante OSD  
3. Pulsante di selezione  
4. LED

#### CE790T/CE790R - Lato posteriore/Vista laterale

1. Presa d'alimentazione  
2. Porta audio  
3. Porta LAN  
4. Porta di collegamento alla console  
5. Terminale di messa a terra (vista laterale)

#### Installazione dell'hardware

##### Montaggio in rack

Per una maggiore comodità e flessibilità, il CE790T e il CE790R possono essere montati in rack. Per montare in rack il dispositivo, procedere come segue:

- Utilizzando le viti fornite con il kit di montaggio in rack, avvitare le staffe sopra o sotto al dispositivo.
- Avvitare i supporti per il montaggio sul rack.

Nota: Queste viti non vengono fornite. Si consiglia di utilizzare M5 x 12 viti Phillips tipo 1 a croce.

### 요구 사항

#### 콘솔

• 설비 내에 있는 컴퓨터에서 사용하는 최고해상도를 가진 VGA, SVGA, SXGA, UXGA, 멀티싱크 모니터

• USB 키보드

• USB 마우스

#### 컴퓨터

• 디스플레이를 지원하는 시스템에 연결된 각 컴퓨터에 설치되어 있어야만 합니다.

• VGA, SVGA, SXGA, UXGA, 멀티싱크 카드

• USB 호스트 컨트롤러 및 A 타입 USB 포트

#### 케이블

• 최적의 신호 전송 및 간단한 설치를 위해, 패키지에서 제공하는 고급형 전용 USB KVM 케이블을 사용할 것을 권장합니다.

주의: 신호 전송 및 간단한 설치를 위해, 패키지에서 제공하는 고급형 전용 USB KVM 케이블을 사용할 것을 권장합니다.

- Per una configurazione punto-punto, collegare l'altra estremità del cavo Cat 5e alla porta LAN del CE790R (sul retro del dispositivo).
- Per una configurazione in rete, utilizzare un cavo Cat 5e per collegare la porta LAN del CE790R alla LAN TCP/IP.
- Inserire il secondo alimentatore (in dotazione) in una presa di corrente CA, quindi inserire il cavo dell'alimentatore nella presa d'alimentazione del CE790R.
- Solo per la configurazione in rete: Utilizzare l'OSD per configurare le impostazioni di rete per i dispositivi CE790T e CE790R. Ripetere questi passi per ogni sistema CE790 da installare sulla LAN TCP/IP.

### Funzionamento

#### Aprire l'OSD

L'OSD (On Screen Display) è un metodo di utilizzo dei comandi del computer e delle operazioni di configurazione tramite menu e tastiera. Sia il trasmettore sia il ricevitore CE790 sono dotati di OSD. Tutte le procedure partono dalla schermata principale OSD. Per aprire l'OSD, premere il tasto OSD sul lato anteriore del dispositivo o due volte il tasto [Blok Scorr].

Nota: È possibile cambiare il tasto rapido di apertura della porta OSD con i tasti [CTRL] sinistra o destra.

Selezionare la destinazione (CE790T) o la fonte (CE790R) da collegare.
