HDMI HDBaseT-Lite matrix switch

[VM3909H](#)

- Up to DCI 4K @60Hz
- Power over HDBaseT
- Up to 18 connection profiles
- Up to 9 inputs and 9 outputs
- HDMI over a single Cat5e/6A cable
- Mobile control via award winning WebGUI

"Thanks to the ATEN VM3909H, participants can easily hook up their devices to our presentation system."

- Head of EA Lab, Researcher

Requirements

- Ability to connect 9 output devices across the whole meeting room
- Fast and easy connection establishment via HDMI from any source to any output device
- Change output and input channels via web interface

Benefits

- **DCI 4K @60Hz** – Crystal clear 4K video up to 40 meters and 1080p up to 70 meters
- **User interface** – Swift profile control and setup with the Red Dot Award winning user interface.
- **HDMI input** – Supports stakeholder integration by giving them the possibility to use their own devices in meetings.

EA European Academy of Technology and Innovation Assessment, Germany

The EA is a non-profit, interdisciplinary research institute founded in 1996 to study the relation between society and technological development. Science and innovation open many paths to social change. The Academy maps future scenarios and shares potential impacts with policymakers and business leaders.

The EA often brings together multiple stakeholders to present and assess research outcomes, which requires a flexible and easy-to-use presentation system. Visitors and researchers use laptops, tablets and smartphones to show their findings on a large videowall. ATEN's HDBaseT matrix switch turns out to be an excellent, high quality media distribution solution for EA's meeting room setup.
