Compliance Statements

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

The device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Warning

Operation of this equipment in a residential environment could cause radio interference.

Achtung

Der Gebrauch dieses Geräts in Wohnumgebung kann Funkstörungen verursachen.

KCC Statement

유선 제품용 / A 급 기기 (업무용 방송 통신 기기)
이 기기는 업무용 (A 급) 전자파적합기기로서 판매자 또는 사용자는 이
점을 주의하시기 바라며, 가정 외의 지역에서 사용하는 것을 목적으로
합니다.

Industry Canada Statement

This Class A digital apparatus complies with Canadian ICES-003.

CAN ICES-003 (A) / NMB-003 (A)

RoHS

This product is RoHS compliant.

About this Manual

This user manual is provided to help you get the most from the VE1901AEUT / VE1901AUST unit. It covers all aspects of installation, configuration, and operation. An overview of the information found in the manual is provided below.

Chapter 1, Introduction introduces you to the VE1901AEUT / VE1901AUST DisplayPort HDBaseT-Lite Transmitter with EU / US Wall Plate / PoH. Its purpose, features, installation considerations, and panel components are presented and described.

Chapter 2, Hardware Setup describes the steps that are necessary to quickly and safely set up your installation.

Chapter 3, Operation explains the Long Reach Mode and limitations, and how to set up the input detection mode using the a pushbutton and RS-232 commands.

An Appendix provides a list of safety instructions and precautions, contact information for ATEN technical support, product specifications, and other technical information.

Note:

- ♦ Read this manual thoroughly and follow the installation and operation procedures carefully to prevent any damage to the unit or any connected devices.
 - ♦ ATEN regularly updates its product documentation for new features and fixes. For an up-to-date VE1901AEUT / VE1901AUST documentation, visit <http://www.aten.com/global/en/>
-

Conventions

This manual uses the following conventions:

Monospaced	Indicates text that you should key in.
[]	Indicates keys you should press. For example, [Enter] means to press the Enter key. If keys need to be chorded, they appear together in the same bracket with a plus sign between them: [Ctrl+Alt].
1.	Numbered lists represent procedures with sequential steps.
◆	Bullet lists provide information, but do not involve sequential steps.
>	Indicates selecting the option (on a menu or dialog box, for example), that comes next. For example, Start > Run means to open the <i>Start</i> menu, and then select <i>Run</i> .
	Indicates critical information.

Chapter 1

Introduction

Overview

The ATEN VE1901AEUT / VE1901AUST DisplayPort HDBaseT-Lite transmitter delivers 4K signals up to 40 m over a single Cat 5e/6/6a or ATEN's tailor-made HDBaseT cable, ensuring users to stabilize DisplayPort signal transmission with support of Deep color and embedded HD lossless audio formats. During high-quality video transmission, the transmitter can resist signal interference with the equipped HDBaseT Anti-jamming technology and offer a reliable signal extension.

The VE1901AEUT / VE1901AUST can be easily mounted in a 1-gang junction box with EU / US wall plate, concealing bulky cable setups and presenting needed information in sight. In addition, with built-in PoH (Power over HDBaseT) function, the VE1901AEUT / VE1901AUST receives power supply from a connected PoH PSE supported receiver and streamlines complex power line deployment.

With the share function, the VE1901AEUT / VE1901AUST can remotely switch source when connecting to a compatible receiver, e.g., VP1421, bringing users for more convenient AV extension. This compact transmitter provides a neat and simple installation on walls or tables, enabling users to elegantly immerse their AV applications into any environment. Therefore, the VE1901AEUT / VE1901AUST is ideal for use in meeting rooms, digital educational environments or any application requiring stable high-quality transmission and effortless installation.

Features

- ♦ Extends DisplayPort signals with superior video quality over a single Cat 5e/6/6a cable or ATEN's tailor-made HDBaseT cable
 - ♦ 4K up to 40 m
 - ♦ 1080p up to 70 m

Note: For a list of compatible cables, see the Compatible Cables section on the product page.

- ♦ Built-in PoH (Power over HDBaseT) function – the VE1901AEUT / VE1901AUST receives power supply from the HDBaseT output port
- ♦ DisplayPort (Deep color, 4K); HDCP compliant
- ♦ Designed to mount in a 1-gang junction box with EU / US wall plate
- ♦ Supports RS-232 channel transmission
- ♦ HDBaseT Anti-jamming – resists signal interference during high-quality video transmission using HDBaseT technology
- ♦ Share function – the VE1901AEUT / VE1901AUST can remotely switch source when connecting to a compatible receiver, e.g., VP1421
- ♦ LED indication of device status
- ♦ Built-in 8KV / 15KV ESD protection
- ♦ DC jack and PoH for power redundancy
- ♦ Plug-and-play

Planning the Installation

Requirements

Prepare the following before installing the VE1901AEUT / VE1901AUST unit:

- ♦ 1 DisplayPort source device
- ♦ 1 Cat 5e/6/6a or ATEN's tailor-made HDBaseT cable

Note: For a list of compatible cables, see the Compatible Cables section on the product page.

Considerations

- ♦ To ensure video quality, ATEN recommends using a Cat 5e/6/6a cable.

Note: For optimal performance, it is recommended to use ATEN's tailor-made HDBaseT cable.

- ♦ The maximum transmission distance varies at different parts of the transmission:

Connection	Interface	Resolution	Distance
Computer to the VE1901AEUT / VE1901AUST	DisplayPort	4K	3 m
The VE1901AEUT / VE1901AUST to a compatible ATEN HDBaseT Receiver	Cat 5e/6	4K	35 m
	Cat 6a	4K	40 m
A compatible ATEN Video Receiver to the display	DisplayPort (example)	4K	3 m

Note: The maximum transmission distance for 1080p resolution using an ATEN's tailor-made HDBaseT cable is 70 m.

Compatible ATEN Video Extenders

The VE1901AEUT / VE1901AUST is compatible with a wide range of ATEN HDBaseT video receivers. Visit our official web site for more details.

Components

Front View

VE1901AEUT

VE1901AUST

No.	LED	Indication	Description
1	power LED	Lights green	The unit is receiving power.
2	link LED	Lights orange	The transmission to the receiver is stable.
		Blinks orange	The transmission to the receiver is unstable.
3	share pushbutton	N/A	Press this pushbutton to share source with the VP1421 (example). For details, see <i>Connecting the Unit with VP1421</i> , page 18.
4	DisplayPort input port	N/A	Connects to the DisplayPort out port on the source device.

Note:

- ◆ The power and link LED blink at the same time to indicate that the firmware upgrade is in progress.

Rear View

VE1901AEUT

VE1901AUST

No.	Component	Description
1	RS-232 for bypass channel switch	Put the switch to ON to bypass RS-232 serial data for remote control on the device connected to the VE1901AEUT / VE1901AUST using serial commands.
2	RS-232 for firmware upgrade switch	This switch is reserved for ATEN Technical Support. If you would like to do a firmware upgrade yourself, please contact your dealer.
3	firmware upgrade port	This port is reserved for ATEN Technical Support. If you would like to do a firmware upgrade yourself, please contact your dealer.

No.	Component	Description
4	RS-232 terminal (Tx & Rx)	Connects to the 5-pin terminal block for the following purposes. ◆ For remotely control on the connected device via RS-232 serial commands, connect the RS-232 main controller, such as a PC or a control system. See <i>RS-232 Channel Transmission</i>, page 15. ◆ For source sharing with the VP1421, connect the 5-pin terminal block to the DO contact closure terminal and the VP1421. See <i>Connecting the Unit with VP1421</i>, page 18. ◆ For power redundancy, connect the 5-pin terminal block to the +5V DC power-in terminal. See <i>Power Supply Information</i>, page 14. ◆ For RS-232, DO contact closure, and +5V DC power-in terminals to work, connect the ground terminal (GND) to a ground wire. See <i>Terminal Block Connection</i>, page 13.
5	DO contact closure terminal (DO for share pushbutton)	
6	+5V DC power-in terminal (+5V)	
7	ground terminal (GND)	
8	grounding terminal	Grounds the VE1901AEUT / VE1901AUST to prevent damages from power surge or static electricity.

Chapter 2

Hardware Setup

1. Please review the safety information regarding the placement of this device in *Safety Instructions*, page 19.
2. Do not power on the VE1901AEUT / VE1901AUST until all the necessary hardware is connected.

Mounting the VE1901AEUT / VE1901AUST Unit

VE1901AEUT / VE1901AUST is designed to be installed in a wall, ground, or a table.

Site Preparation

Choose a location where cables are free of interference and install the cables into the wall before installing the unit.

The unit can be installed into a wall box or simply into a recession in the wall. Please reserve enough space in the site for the body of the unit.

For more information on the recommended reserved space for each unit, see page 24.

Drawing Screw Site

Screw sites are required to secure the unit into the wall. There are regional template screw sites and the unit can use the sites easily.

If you wish to create your own installation sites, the dimensions below will help you decide how to draw them.

Template is available at the end of the document for both models, please refer to *Template Printing* on page 33 for more details.

VE1901AEUT Wall Mount

1. Secure the faceplate to the unit using the 4 PF screws provided.

2. Secure the unit to the installation site using the 2 pan head screws provided, and attach the rubber pads onto the pan head screws. This installation site can be a wall, ground, or table.

VE1901AUST Wall Mount

1. Secure the unit to a wall box or mud ring using the flat head screws provided.

Note: The wall box and mud ring are not provided in the package.

2. Cover the unit by attaching the faceplate to it. Push-in the upper part and the lower part of the faceplate until it clicks in place. No screws are needed. This installation site can be a wall or ceiling.

Connecting the VE1901AEUT / VE1901AUST Unit

Follow the steps below to connect the VE1901AEUT / VE1901AUST to a source, a compatible ATEN HDBaseT receiver, and other controls as required.

1. Ground the unit by connecting one end of a grounding wire to a suitable grounded object.

Note: Do not omit this step. Proper grounding helps prevent damage to the unit from power surges or static electricity.

2. Connect the DisplayPort input port of the unit to the DisplayPort output port on your video source device using a DisplayPort cable.
3. Connect the unit to power by doing one, or both of the following for power redundancy:
 - ◆ Connect one end of a Cat 5e/6/6a cable to the HDBaseT out port with PoH PD power receiving on the transmitter, and then connect the other end to the HDBaseT input port on a PoH PSE supported receiver (e.g., VP1421).

Note: If the connected receiver is not PoH PSE supported (e.g., VE901R), follow step 6.

- ◆ Connect the 5-pin terminal block to the +5V DC power-in and ground terminals on the unit (refer to step 6).

4. Connect the DisplayPort output port on the VE901R to a display device using a DisplayPort cable.
5. (Optional) Connect the RS-232 interface of your computer or control system to the RS-232 and ground terminals on the unit using the 5-pin terminal block provided.
6. (Optional) Please follow the instructions described in Power Supply Information on page 13. Then plug the 5-pin terminal block into the +5V DC power-in and ground terminals on the unit to power on the device.
7. Plug the power adapter cable into the power jack on the VE901R.
8. Power on all connected devices.

Terminal Block Connection

Follow the instructions below for terminal block connection:

1. Detach the terminal block from the port (e.g. RS-232 serial port).
2. Loosen the screws on top of the terminal block (turning a screwdriver counter-clockwise) to open the gates.
3. Insert the wires into the gates according to the label on the unit.
4. Tighten the screws for each gate to secure the wires to the terminal block.
5. Attach the terminal block back to its port.

Power Supply Information

(Optional) If you wish to use power adapter for power, follow the steps below.

1. Cut the connector end of the power adapter.
2. Strip 5 mm (0.5cm) off the insulation cover of the power adapter cable to expose two wires: a +5V wire and a GND (grounding) wire.
3. Insert the exposed +5V wire and GND (grounding) wire tightly into the 5-pin terminal block provided, which can be connected to the unit for power supply. Refer to *Terminal Block Connection* on page 13 for more details.

Note: One method to determine an exposed wire's polarity (i.e., +5V or GND) is by using a voltmeter.

RS-232 Channel Transmission

You can manage the connected devices via RS-232 serial devices, such as computers or bar code scanners. The RS-232 signal transmission flow can be illustrated as follows:

Note: The unit used in the diagram below is VE1901AUST, the procedure for connecting VE1901AEUT is identical.

The general concept here is that a RS-232 signal can be transmitted (Tx) to the receiving (Rx) end of a unit. The received signal can then be transmitted (Tx) to the receiving (Rx) end of another unit. The RS-232 signals can be transmitted back the other way.

This Page Intentionally Left Blank

Chapter 3

Operation

RS-232 Serial Transmission

The RS-232 Serial Transmission allows you to bypass serial data to remotely control the device connected to the VE1901AEUT / VE1901AUST using serial commands.

Bypass

RS-232 serial data is bypassed from the controller PC or Pad to other connected devices. Remember to set the RS-232 for bypass channel switch to **ON**.

VE1901AEUT

RS-232 for
bypass channel
switch

VE1901AUST

RS-232 for
bypass channel
switch

Connecting the Unit with VP1421

To share source device to the VP1421, follow the steps below. For more information on how to connect the VP1421, see *VP1421-VP1421 user manual*.

Note: The unit used in the diagram below is VE1901AUST, the procedure for connecting VE1901AEUT is identical.

1. Connect the DO contact closure and ground terminals to the contact in and ground terminals on the VP1421.
2. Go to VP1421's web console. From the General page, use the drop-down menu to select Display A or Display B for the Target of Contact Closure (DI).

3. Press the share button to remotely play the HDBaseT input source on VP1421's Display A or Display B depending on your Target of Contact Closure settings from step 2.

Safety Instructions

General

- ♦ This product is for indoor use only.
- ♦ Read all of these instructions. Save them for future reference.
- ♦ Follow all warnings and instructions marked on the device.
- ♦ Do not place the device on any unstable surface (cart, stand, table, etc.). If the device falls, serious damage will result.
- ♦ Do not use the device near water.
- ♦ Do not place the device near, or over, radiators or heat registers.
- ♦ The device cabinet is provided with slots and openings to allow for adequate ventilation. To ensure reliable operation, and to protect against overheating, these openings must never be blocked or covered.
- ♦ The device should never be placed on a soft surface (bed, sofa, rug, etc.) as this will block its ventilation openings. Likewise, the device should not be placed in a built in enclosure unless adequate ventilation has been provided.
- ♦ Never spill liquid of any kind on the device.
- ♦ Unplug the device from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
- ♦ The device should be operated from the type of power source indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
- ♦ To prevent damage to your installation it is important that all devices are properly grounded.
- ♦ Do not allow anything to rest on the power cord or cables. Route the power cord and cables so that they cannot be stepped on or tripped over.
- ♦ Position system cables and power cables carefully; Be sure that nothing rests on any cables.
- ♦ Never push objects of any kind into or through cabinet slots. They may touch dangerous voltage points or short out parts resulting in a risk of fire or electrical shock.
- ♦ Do not attempt to service the device yourself. Refer all servicing to qualified service personnel.

- ♦ If the following conditions occur, unplug the device from the wall outlet and bring it to qualified service personnel for repair.
 - ♦ The power cord or plug has become damaged or frayed.
 - ♦ Liquid has been spilled into the device.
 - ♦ The device has been exposed to rain or water.
 - ♦ The device has been dropped, or the cabinet has been damaged.
 - ♦ The device exhibits a distinct change in performance, indicating a need for service.
 - ♦ The device does not operate normally when the operating instructions are followed.
- ♦ Only adjust those controls that are covered in the operating instructions. Improper adjustment of other controls may result in damage that will require extensive work by a qualified technician to repair.

Technical Support

International

Template Printing

Please use 1:1 ratios when printing.

We also recommend using A4 sized paper or larger.

After printing, please measure the print so that the labeled measurement is correct.
