Mounting the 2-in-1U KE6948A Rack Mount Kit for 2 Units

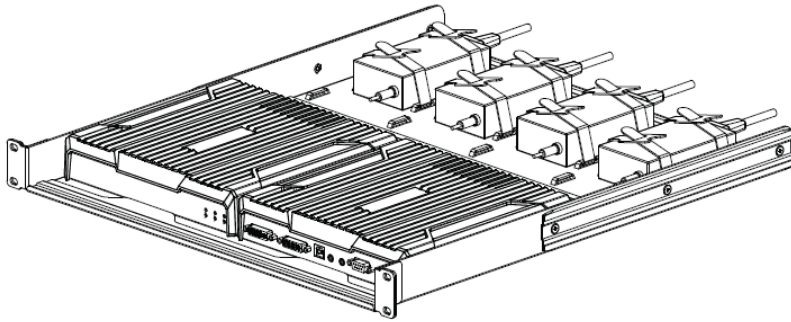

- Using the M3 screws provided in the mounting kit, attach the mounting plate to the bottom of two KE6948A units, as shown below.

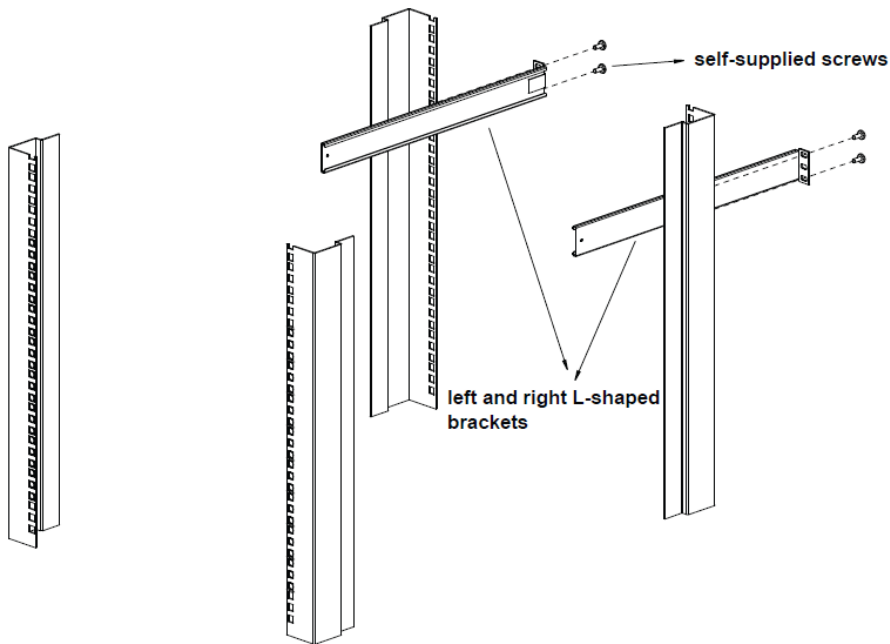

- Attach the power adapters and power cords to the mounting plate. Optionally, you can use self-supplied cable ties to secure them to the mounting plate, as shown below.

3. If cable ties are used, tighten them securely.

4. Attach the left and right L-shaped brackets to the back of the rack, and secure them in place with four self-supplied screws installed through the tabs.

5. Slide the mounting plate into place by inserting its left and right side bars into the corresponding L-shaped brackets on the rack. Then screw the front brackets to the rack with four self-supplied screws.
