CS1308/CS1316 8/16-Port PS/2-USB KVM Switch Quick Start Guide

Requirements

Console

The following hardware components are required for the KVM console:
• A VGA, SVGA, or multisync monitor capable of displaying the highest resolution provided by any computer in the installation.

• A keyboard and mouse (USB or PS/2)

Computers

The following hardware components are required for each computer:

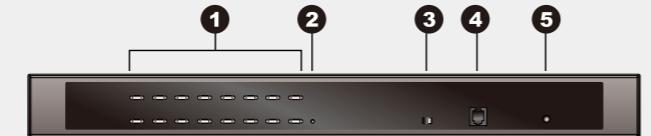

• A VGA, SVGA, or multisync video graphics card with an HDB-15 port.

• PS/2 mouse and keyboard ports (6-pin Mini-DIN), at least one USB port.

- Use the M3 x 8 Phillips hex head screws supplied with the rack mounting kit to screw the rack mounting brackets onto the side panels near the front of the unit.
- Place the CS1308 / CS1316 in the rack. Position it so that the holes in the mounting brackets line up with the holes in the rack. Secure the mounting brackets to the front of the rack.

Grounding

To prevent damage to your installation it is important that all devices are properly grounded. Use the included grounding wire to ground the CS1308 / CS1316 by connecting one end of the wire to the grounding terminal, and the other end of the wire to a suitable grounded object.

Single Level Installation

In a single level installation, there are no additional switches cascaded from the first unit. To set up a single level installation do the following:

1. Ground the CS1308 / CS1316 and make sure that power has been turned off to all the computers you will be connecting up.
2. Using the console cable provided, connect a keyboard, mouse, and monitor to the CS1308 / CS1316 console port.
3. Use KVM cable sets, to connect any available KVM port to the keyboard, video and mouse ports of the computer you are installing.
4. Plug the power adapter cable into the CS1308 / CS1316 power jack, then plug the power adapter into an AC power source.
5. Turn on the power to the computers.

Operation

The CS1308 / CS1316 provides three port selection methods to access the computers on the installation: Manual, an OSD (on-screen display) menu system, and Hotkeys.

1. Manual Port Switching

Use the front panel pushbutton switches to manually switch to a port.

Rack Mounting – Front

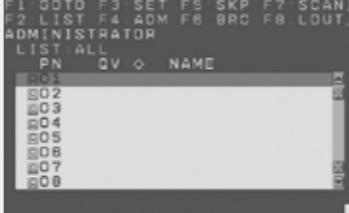

E Hardware Installation

Single Level Installation

To prevent damage to your installation from power surges or static electricity, it is important that all connected devices are properly grounded.

F OSD Port Switching

2. OSD Port Switching

To bring up the OSD Main Screen, tap the Scroll Lock key twice.

The OSD incorporates a two level (administrator / user) password system. Before the OSD main screen displays, a login screen appears requiring a password. If this is the first time that the OSD is used, or if the password function has not been set, simply press [Enter]. The OSD main screen displays in administrator mode.

To bring the KVM focus to a port. Double Click it, or move the Highlight Bar to it then press [Enter].

Note: You can optionally change the OSD hotkey to the Ctrl key, in which case you would press [Ctrl] twice. With this method, you must press the same [Ctrl] key.

3. Keyboard Port Switching

All hotkey operations begin by invoking Hotkey mode. There are two possible keystroke sequences used to invoke Hotkey mode, though only one can be operational at any given time:

Number Lock and Minus Keys

1. Hold down the Num Lock key;
2. Press and release the minus key;
3. Release the Num Lock key:

[Num Lock] + [-]

Control and F12 Keys

1. Hold down the Ctrl key;
2. Press and release the F12 key;
3. Release the Ctrl key:

[Ctrl] + [F12]

Hotkey Summary Table

[A] [Enter] or [Q] [Enter]	Invokes Auto Scan mode. When Auto Scan mode is in effect, [P] or left-click pauses auto-scanning. When auto-scanning is paused, pressing any key or another left-click resumes auto-scanning.
[B]	Toggles the beeper on or off.
[Esc] or [Spacebar]	Exits hotkey mode.
[F1]	Set Operating System to Windows
[F2]	Set Operating System to Mac
[F3]	Set Operating System to Sun
[F5]	Performs a keyboard / mouse reset on the target computer.
[H]	Toggles the Quick Hotkey invocation keys between [Ctrl] + [F12] and [Num Lock] + [-].
[R] [Enter]	This administrator only hotkey restores the switch's default values.
[PN] [Enter]	Switches access to the computer that corresponds to that port ID.
[T]	Toggles the OSD Hotkey between [Ctrl] [Ctrl] and [Scroll Lock] [Scroll Lock].
[←]	Invokes Skip mode and skips from the current port to the first accessible port previous to it.
[→]	Invokes Skip mode and skips from the current port to the next accessible port.

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Warning: Operation of this equipment in a residential environment could cause radio interference.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important: Before proceeding, download the Installation and Operation Manual by visiting the website, www.aten.com and navigating to the product page. The manual includes important warnings, loading specifications and grounding instructions.

Achtung: Der Gebrauch dieses Geräts in Wohnheim kann Funktionen verursachen.

警告使用者：此為中類資訊技術設備，於居住環境中使用時，可能會造成射頻擾動；在此種情況下，使用者會被要求採取某些適當的抑制。

이 기기는 업무용(A급) 전자파작합기기로서 판매자 또는 사용자는 이 점을 주의하시기 바이며, 기가파의 지역에서 사용하는 것을 적으로 합니다.

Commutateur KVM 8/16 Port PS/2-USB CS1308/CS1316 – Guide de mise en route rapide

Configuration requise

Consoles

Les composants matériels suivants sont requis pour chaque console KVM :

• Moniteur VGA, SVGA ou multisync prenant en charge la plus haute résolution utilisée sur les ordinateurs à installer

• Clavier et souris (USB ou PS/2)

Ordinateurs

Les composants matériels suivants sont requis pour chaque ordinateur :

• Une carte graphique VGA, SVGA ou multisync avec un port HDB-15

• Ports souris et clavier PS/2 (mini-DIN à 6 broches), au moins un port USB

Description du matériel

Voraussetzungen

Konsolen

Für jede KVM-Konsole sind folgende Geräte erforderlich:

• Ein VGA-, SVGA- oder multisync-Monitor, der in der Lage ist, die höchste Auflösung darzustellen, die Sie auf einem der zu installierenden Computer verwenden möchten.

• Tastatur und Maus (USB oder PS/2)

Computer

Für jeden Computer muss Folgendes installiert werden:

• Eine VGA-, SVGA- oder multisync-Grafikkarte mit HDB-15-Ausgang

• PS/2-Anschlüsse für Maus und Tastatur (6-polige Mini-DIN-Buchse), mindestens ein USB Anschluss

Requisitos

Consoles

Se requieren los siguientes componentes de hardware para cada consola KVM:

• Monitor VGA, SVGA o multisync capaz de representar la resolución más elevada que vaya a usar con cualquiera de los ordenadores a instalar

• Teclado y ratón (USB o PS/2)

Ordenadores

En cada ordenador se tienen que instalar los siguientes componentes:

• Una tarjeta gráfica VGA, SVGA o multisync con un puerto HDB-15

• Puerto para teclado y ratón PS/2 (mini-DIN de 6 patillas), por lo menos un puerto USB

Presentación del hardware

Vista frontal

CS1308/CS1316 8/16 Port PS/2-USB KVM Switch – Guida rapida

Requisiti

Console

Per ogni console KVM è necessario utilizzare i seguenti componenti hardware:

- un monitor VGA, SVGA o Multisync, con la più alta risoluzione fra quelle utilizzate dai computer collegati
- Tastiera e mouse (USB o PS/2)

Computer

In ogni computer deve essere installato il seguente equipaggiamento:

- Una scheda grafica VGA, SVGA o Multisync con una porta HDB-15
- Porta PS/2 per mouse e tastiera (Mini-DIN a 6 pin), almeno 1 porta USB

요구 사양

콘솔

각 KVM 콘솔에는 다음의 아드웨어 장비들이 요구됩니다.

- VGA, SVGA, 디스플레이의 고해상도를 지원하는 멀티스캔 모니터.
- 키보드와 마우스 (USB 또는 PS/2)

컴퓨터

각 컴퓨터에는 다음의 아드웨어 장비들이 요구됩니다.

- VGA/SVGA/멀티스캔 출력에 대응한 비디오 포트, D-sub 15ピン메스코넥터
- PS/2 키보드 또는 PS/2 마우스, 또는 USB 타입A
