

4U Hinged & Vented Rack Panel

HVP-0419

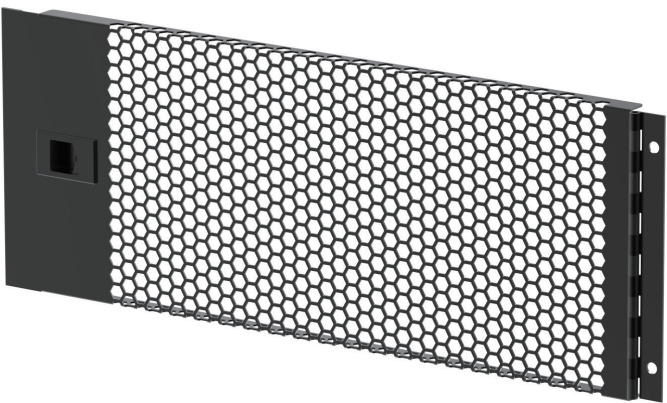

ATEN offers a wide range of flexible rack accessories to support IT personnel in managing racks and installing equipment. All accessories are designed for functionality, ensuring safe equipment operation and user safety, while offering flexible deployment options to meet various rack configuration needs.

The ATEN 4U Hinged & Vented Rack Panel complies with the latest EIA / ECA-310-E standards. It is designed to quickly cover unused rack spaces, preventing foreign objects from entering and ensuring stable and safe operation of internal equipment.

Featuring a hinged design, the panel supports both left- and right-side openings, allowing IT staff to flexibly adjust based on the layout of the data center or server room, making maintenance and inspection more convenient. In addition, the front ventilation slots promote proper airflow and cooling efficiency inside the rack. Compatible with ATEN and other 19-inch standard server or network racks.

Features

- Complies with the latest EIA / ECA-310-E standards
- Quickly covers unused rack spaces to prevent foreign object intrusion
- Hinged design supports left or right opening direction for flexible installation
- Ventilation holes improve airflow and heat dissipation inside the rack
- Suitable for ATEN and other 19-inch standard server/ network racks
