

KA9250

- PS/2 Console Extender (Console Module for the KH0116)
- The KA9250 KVM Extender Module allows a user at a keyboard, video, mouse (KVM) console to manage the servers in a KH0116 16 Port High-Density KVM Switch installation up to 150m away. The KA9250 module connects to the KH0116's RJ-45 remote console port via standard Category 5 cable for a neat and reliable installation. When a local and remote console are present, both can access the KVM switch.

The KA9250 features a custom ASIC to ensure the utmost in reliability and compatibility. It can also sense the distance to the KH0116 and automatically adjust the video gain to compensate. Control your KVM switch from up to 150m away by extending the distance to your KVM console with a KA9250 KVM Extender.
