

Hinged & Vented Rack Panel

RA2000 / RA2100 / RA2200

ATEN offers a wide range of flexible rack accessories to meet the needs of IT personnel in managing racks and installing equipment. Every accessory is designed with both functionality and safety in mind, ensuring operational reliability and adaptability for diverse rack configurations.

The ATEN Hinged & Vented Rack Panel complies with the latest EIA / ECA-310-E standards. It is designed to quickly cover unused rack space, preventing foreign objects from entering and ensuring the stable and safe operation of equipment inside the rack. This panel features a hinged design that supports both left- and right-side opening, allowing flexible adjustments according to room layout and enhancing the convenience of equipment maintenance and inspection for IT personnel.

In addition, the front ventilation slots promote internal airflow and improve cooling efficiency. The panel is compatible with ATEN or other brands' 19-inch racks, including server and network racks.

RA2200

Features

- Quickly covers unused rack space to prevent foreign object intrusion and protect equipment
- Hinged design supports both left and right opening directions for flexible space adjustment
- Vented design promotes internal airflow and heat dissipation
- Suitable for ATEN or third-party 19-inch, server, and network racks
- Compliant with the latest EIA / ECA-310-E standards
