

ORV3 IT Gear Rails

RA8100

ATEN provides a comprehensive range of flexible rack accessories designed to support IT professionals in equipment installation and rack management. All accessories are built with functionality in mind, ensuring safe operation, structural stability, and adaptability for various rack configurations.

ATEN ORV3 IT Gear Rails is a dedicated accessory for ORV3 racks, designed in compliance with the Open Rack V3 Base Spec developed by the Open Compute Project (OCP). Installed on both sides of the rack, it is used to support ORV3 servers, networking, and storage equipment, offering a maximum load capacity of 30 kg to ensure secure installation and enhanced structural integrity.

Features

- Designed to support ORV3 servers, networking, and storage equipment
- Maximum load capacity of 30 kg, providing secure mounting and improved structural stability
- 1 OU (Open Unit) height, installable at any rack unit position with flexible height adjustment to meet various installation needs
- Compatible with ATEN standard ORV3 racks (44 OU / 48 OU) and customized racks (6 OU / 25 OU)
