5 m USB 3.2 Gen 1 Extender Cable

UE350A

As USB 3.2 Gen 1 devices are getting popular, the demand for extending the distance covered by USB devices is growing notably. ATEN's UE350A USB 3.2 Gen 1 Extender Cable not only extends the distance for the USB devices up to 5 meters, but also delivers a throughput of up to 5 Gbps when used in conjunction with a USB 3.2 Gen 1 host and device – an astounding increase that is ten times the capability of USB 2.0.
In addition to its robust speed and transfer rate, the UE350A also provides a durable, high quality connection that harnesses the full capability of the USB 3.2 Gen 1 standard; at the same time, it is backwards compatible with USB 2.0 and 1.1 to ensure reliable data communication. With UE350A, extending the distance of your USB 3.2 Gen 1 device is quick and easy, making it an ideal addition to your USB system setups.
